why is there
many pending
works to be
done?

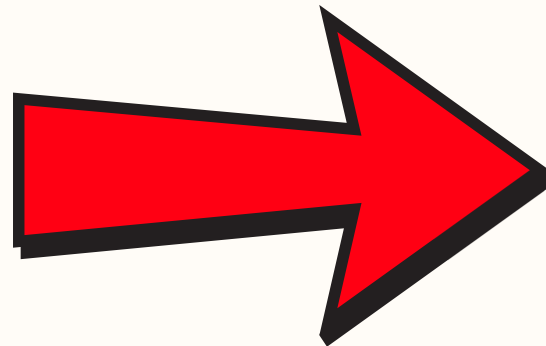

How do I know
my next
maintenance?

So many app
which one to
use?

 Our Experiences

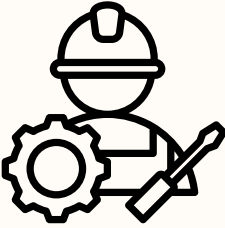

Platform of
Communication

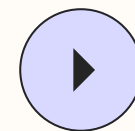

Problems faced FM Teams

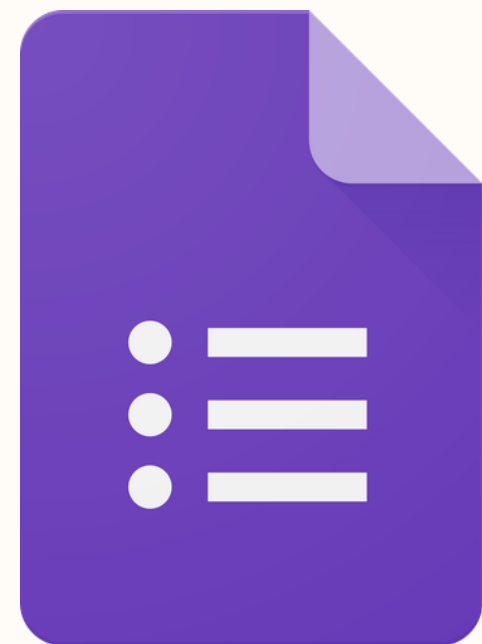

Target Audience	Context	Problem
 Technician	• Missing Information from defect reporting	• Difficulty rectifying defect immediately
 Administrator		• Difficulty creating work order • Overwhelming amount of work • What should i order next month?
 Management	• Unrectified defects • Slow response time • Lack of evidence	• Difficulty overseeing operations • Lack of accountability from technician • How do I know when is my next maintenance date? • Endless choice of application
All	• Overwhelming amount of messages	• Oversight of important messages • Reduce in efficiency

GLIDIFY

Defect Reporting Form

* Name
YIP LI TONG

* Reporting Department
Which department are you from?

* Building Name
Which building is the defect found?

* Level
Which storey?

* Area
Specific area of the level?

* Priority
Critical

Due Date 10/01/2025 03:46:24
1/10/2025 03 :46

Prefilled name (auto-filled)

* Level
E.g. for Basement 1, enter '-1'
Level is required.

* Area
Which specific area of the level?
Area is required.

* Priority
How urgent?
Priority is required.

Prompts user to
provide all defect
details

Auto-set Due Date
When user select priority, due
date is set by default

Allow user to

The fixed features of the app include the top and bottom panel bar. There is also a help information page with an 'i' icon in a circle at the top right corner of the panel bar on every page. Upon clicking on it, it introduces users to each of the features and their functions. The tutorial guide runs automatically and users can exit it at the end of the tutorial [1][2].

Approval Section

Summary Report

Modification Feature

Improvement Made

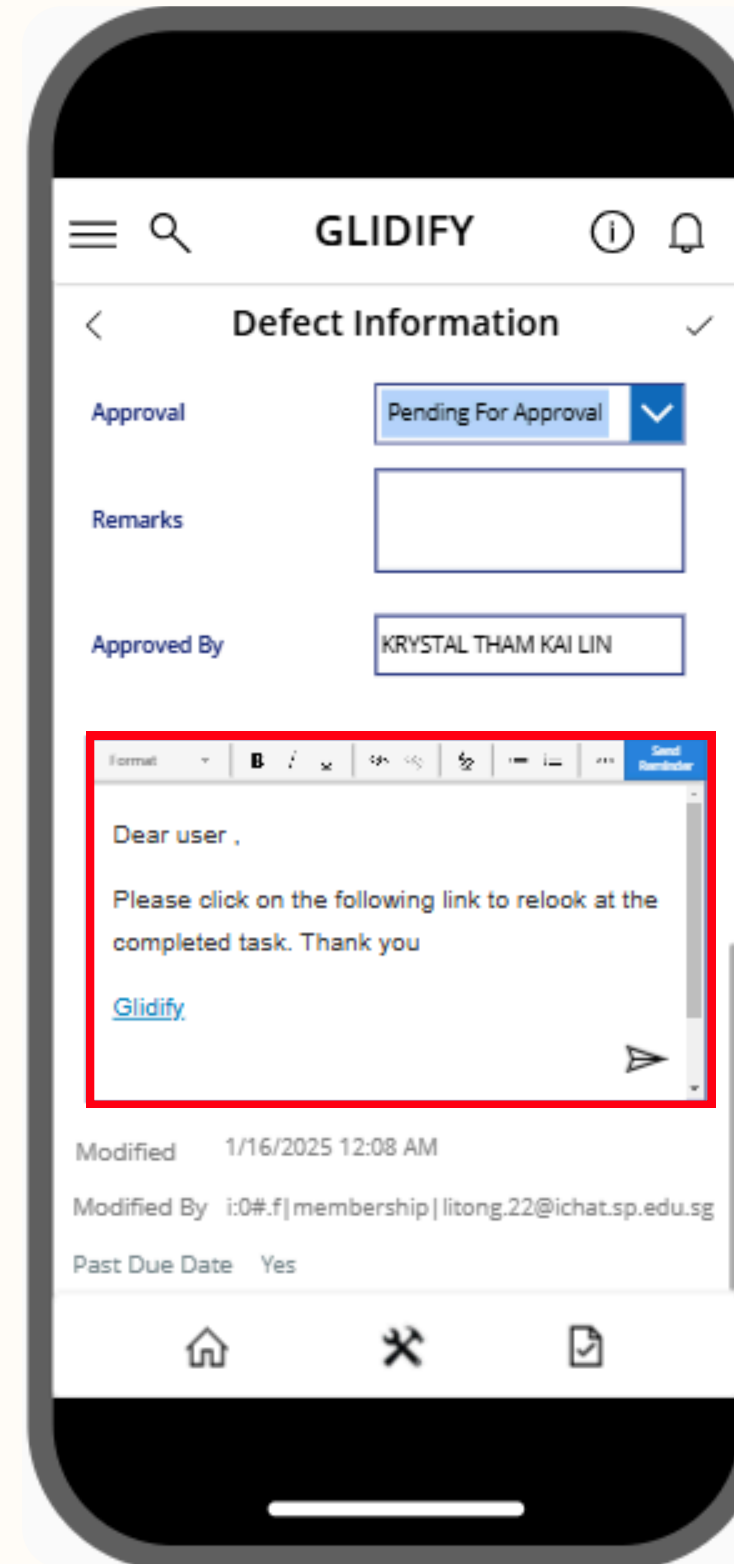

Approval Section

Added Approval

- ensure work done is kept at a certain industrial standard checked by the management

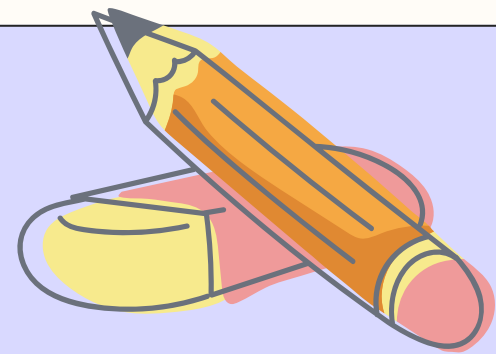

Email function:

- Allow two-way communication
- allowing user to send email to specific person and receive email sent by others
- ensuring members of organization takes accountability of their work

Our team have developed an improved version of application to customized to the requirements within our capabilities.

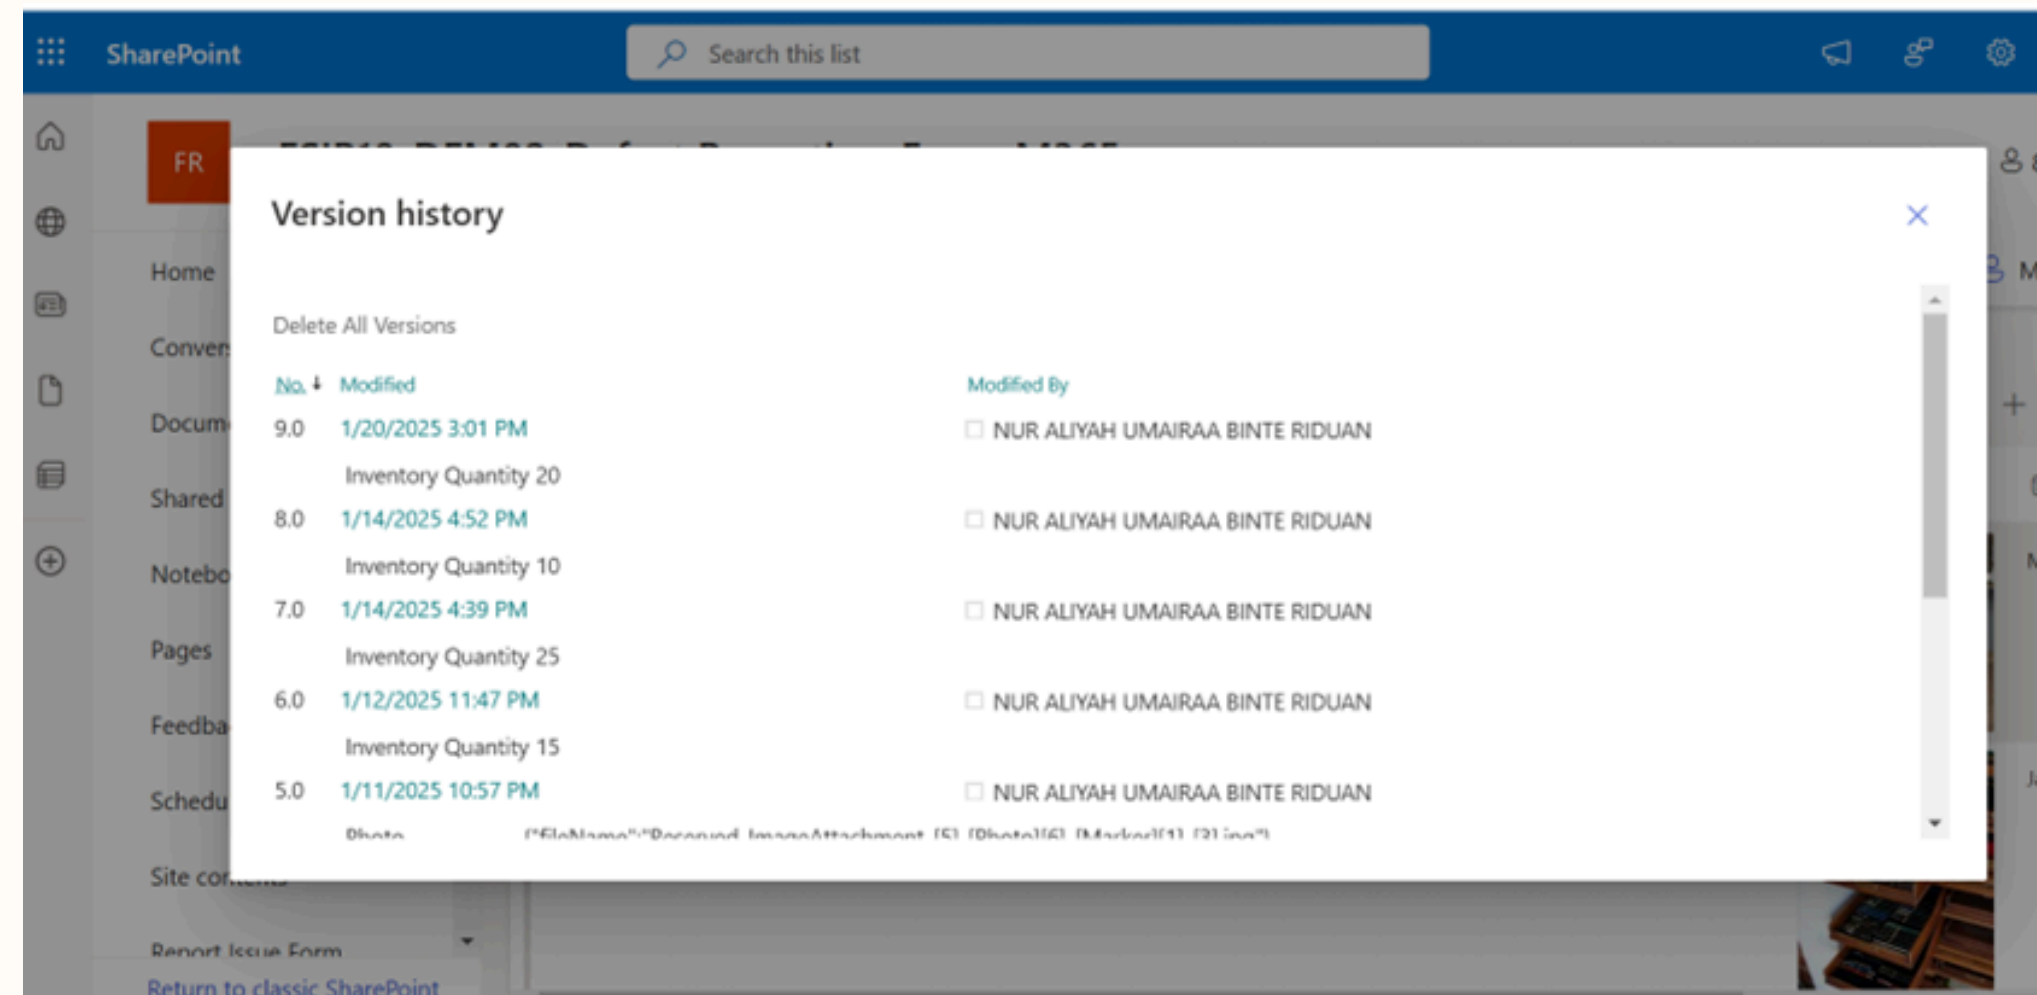

Improvement Made

Modification Section

An automatic recording of modified version in our database

- Sharepoint shows modification data and time & last modified personnel

Our team have developed an improved version of application to customized to the requirements within our capabilities.

Conclusion

Issue	Solution	Glidify
Missing information of defect reported	Provide a series of required question	☒
Overwhelming amount of work	Filter unrectified work	☒
Uncertain work status	Dashboard of work status	☒
Lost track of inventory	Notification of low count inventory	☒
Unsure of next maintenance work	Calendar indicating what maintenance is carried out	☒
Lack of evidence	Photos required for all work	☒

How does it benefit the users?

Conclusion

Uniqueness

Unify elements in FM Operations into 1 common application

Game Changer

Technicians:

- Improve efficiency of maintaining the facilities

Administrators:

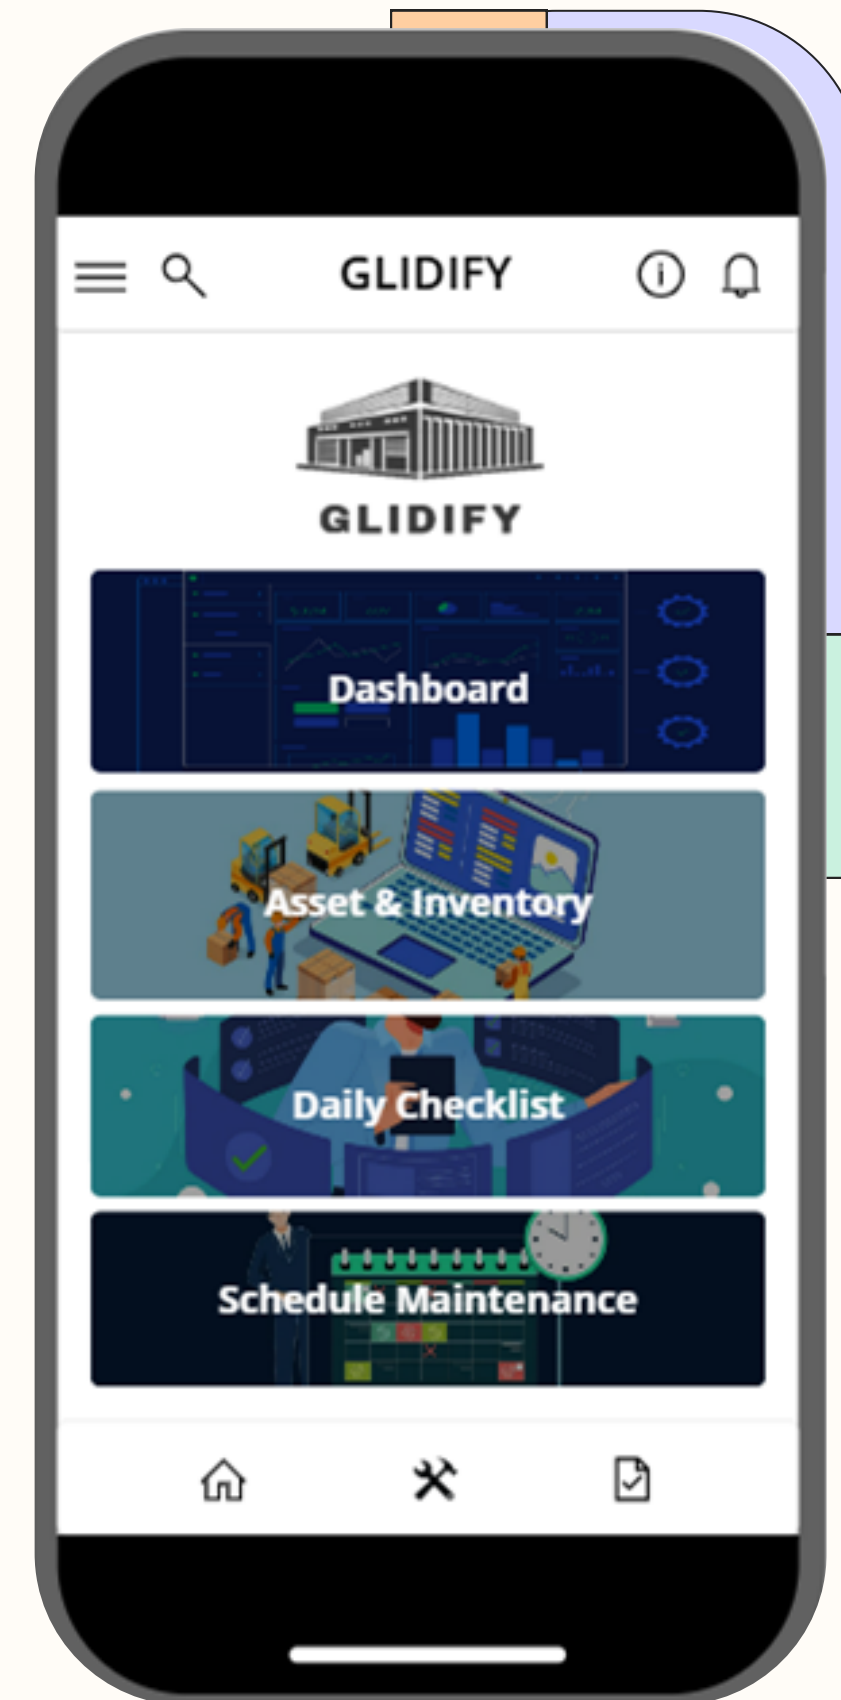

- Boost productivity

Management:

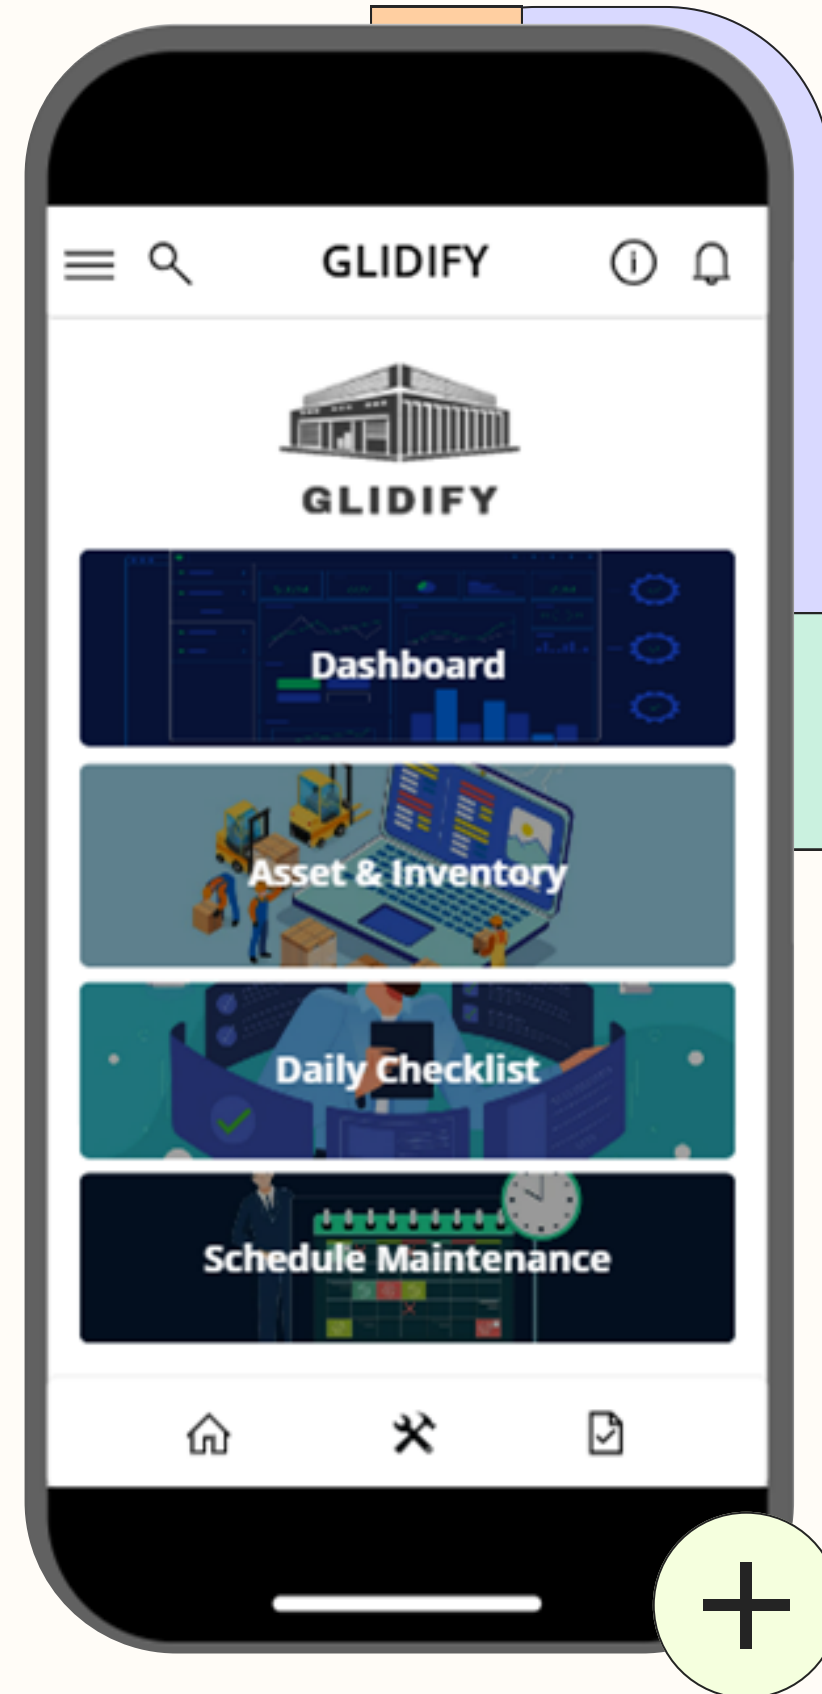

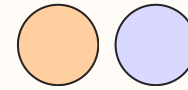

- Ownership-driven team
- Ease of supervising

FM Team:

- Improve operational efficiency
- Utilisation of WhatsApp

How does it benefit the users?
